Mitigation Planning for Resilient Cities

Philip Berke works at the intersection of land use planning, urban ecology and community resilience to environmental hazards. He is currently leading field teams to study urban resilience to flooding in Holland, and six cities on the Atlantic and Gulf coasts.

Dr. Berke is co-author of Natural Hazard Mitigation: Recasting Disaster Policy and Planning, a book selected as one of the 100 Essential Books in Planning for the 20th Century by the American Planning Association.
